

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	06 January 2026
Team ID	
Project Name	Car Rental Request Automation in ServiceNow Using Service Catalog and Workflows
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Car Rental Request	Submit a car rental request Enter Requested Date Enter Pickup Location Enter Drop Location Enter Duration Select Car Type Enter Reason
FR-2	Request Approval	Send the car rental request for approval Process manager approval Track approval status
FR-3	Car Rental Task Management	Create a catalog task after approval Assign the task to Transport Team Process the approved car rental request
FR-4	Notification	Send approval email to the requester Notify requester that the car rental request is approved
FR-5	Request Tracking	View the status of the car rental request
FR-6	Car Unavailability Handling	Detect car unavailable request condition Automatically create an Incident for the unavailable car request

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system should provide a simple and easy-to-use catalog request form for submitting car rental requests.

NFR-2	Security	Only authorized users should be able to submit, approve, and process car rental requests.
NFR-3	Reliability	The system should reliably process requests, approvals, catalog tasks, and notifications without losing request information.
NFR-4	Performance	The system should process car rental requests and automated workflow actions within a reasonable response time.
NFR-5	Availability	The car rental request and workflow should be available to users when the platform is accessible.
NFR-6	Scalability	The system should support an increasing number of car rental requests, users, approvals, and tasks.
