

Project Design Phase-II Technology Stack (Architecture & Stack)

Date	06 January 2026
Team ID	
Project Name	Car Rental Request Automation in ServiceNow Using Service Catalog and Workflows
Maximum Marks	4 Marks

The diagram shows the key components, data flow and infrastructure for the Car Rental Request Automation solution.

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1.	User Interface	Interface through which users submit the car rental request and provide rental details.	ServiceNow Service Catalog
2.	Application Logic-1	Logic for creating and processing the car rental request.	ServiceNow Flow Designer
3.	Application Logic-2	Logic for requesting and processing approval for the car rental request.	ServiceNow Flow Designer – Ask for Approval
4.	Application Logic-3	Logic for creating and assigning the catalog task after approval.	ServiceNow Flow Designer – Create Catalog Task
5.	Database	Stores car rental request, Request/RITM, task, and incident information	ServiceNow Tables
6.	Cloud Database	Cloud-based platform data storage for the application.	ServiceNow Platform Database
7.	File Storage	Stores files or attachments associated with ServiceNow records when required.	ServiceNow Attachments
8.	External API-1	External API integration for the application.	Not applicable
9.	External API-2	External API integration for the application.	Not applicable
10.	Machine Learning Model	Machine learning model used in the application.	Not applicable
11.	Infrastructure (Server / Cloud)	Application is deployed and executed on the ServiceNow cloud platform.	ServiceNow Cloud Platform

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	No separate open-source framework is used for the application.	Not applicable

S.No	Characteristics	Description	Technology
2.	Security Implementations	Access to the application and request processing is controlled through ServiceNow users, roles, and permissions.	ServiceNow Access Controls / Roles
3.	Scalable Architecture	The application uses the ServiceNow cloud platform and workflow-based architecture to support increasing car rental requests.	ServiceNow Cloud Platform / Flow Designer
4.	Availability	The application is available through the ServiceNow cloud platform when the platform is accessible.	ServiceNow Cloud Platform
5.	Performance	Automated workflows reduce manual processing and support timely request, approval, task, and notification processing.	ServiceNow Flow Designer
